Education	HND in Interior Design, AMDT School of Creativity
Based in	Colombo, Sri Lanka
Contact	+94 74 059 1853 · leozon.lk@gmail.com

From floor plan to final render.

I take a space from the floor plan to client-ready renders, working out the layout, materials and lighting on the way. I've done workplace, education, hospitality and retail projects, including a commercial office in Rajagiriya that I designed and delivered, and a full college proposal.

I also run Leona Properties and Leona Travels. We manage holiday villas on the south coast, which has taught me a lot about how guests and owners use a space.

Visualization

D5 Render

Lumion

3ds Max (currently learning)

Modelling, drawing and post

SketchUp

AutoCAD

Photoshop, Illustrator, Premiere Pro

Selected work

01

Envision AI Labs

Rajagiriya · Commercial office · Design and execution

Client project

02

Ummu Dhardha Ladies' Islamic College

Akkaraipattu · Education · Interiors and exterior

Client project, 2026

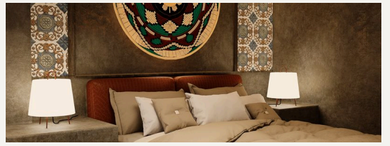

03

Ceylon Tower

Colombo · Hospitality · Guestroom

Client project

04

U.S. Polo Assn. Kandy Flagship

Kandy · Retail · Architecture

Academic project, AMDT

05

Senehasa Sanctuary

Sinharaja · Sustainable architecture

Concept project

Featured project

01

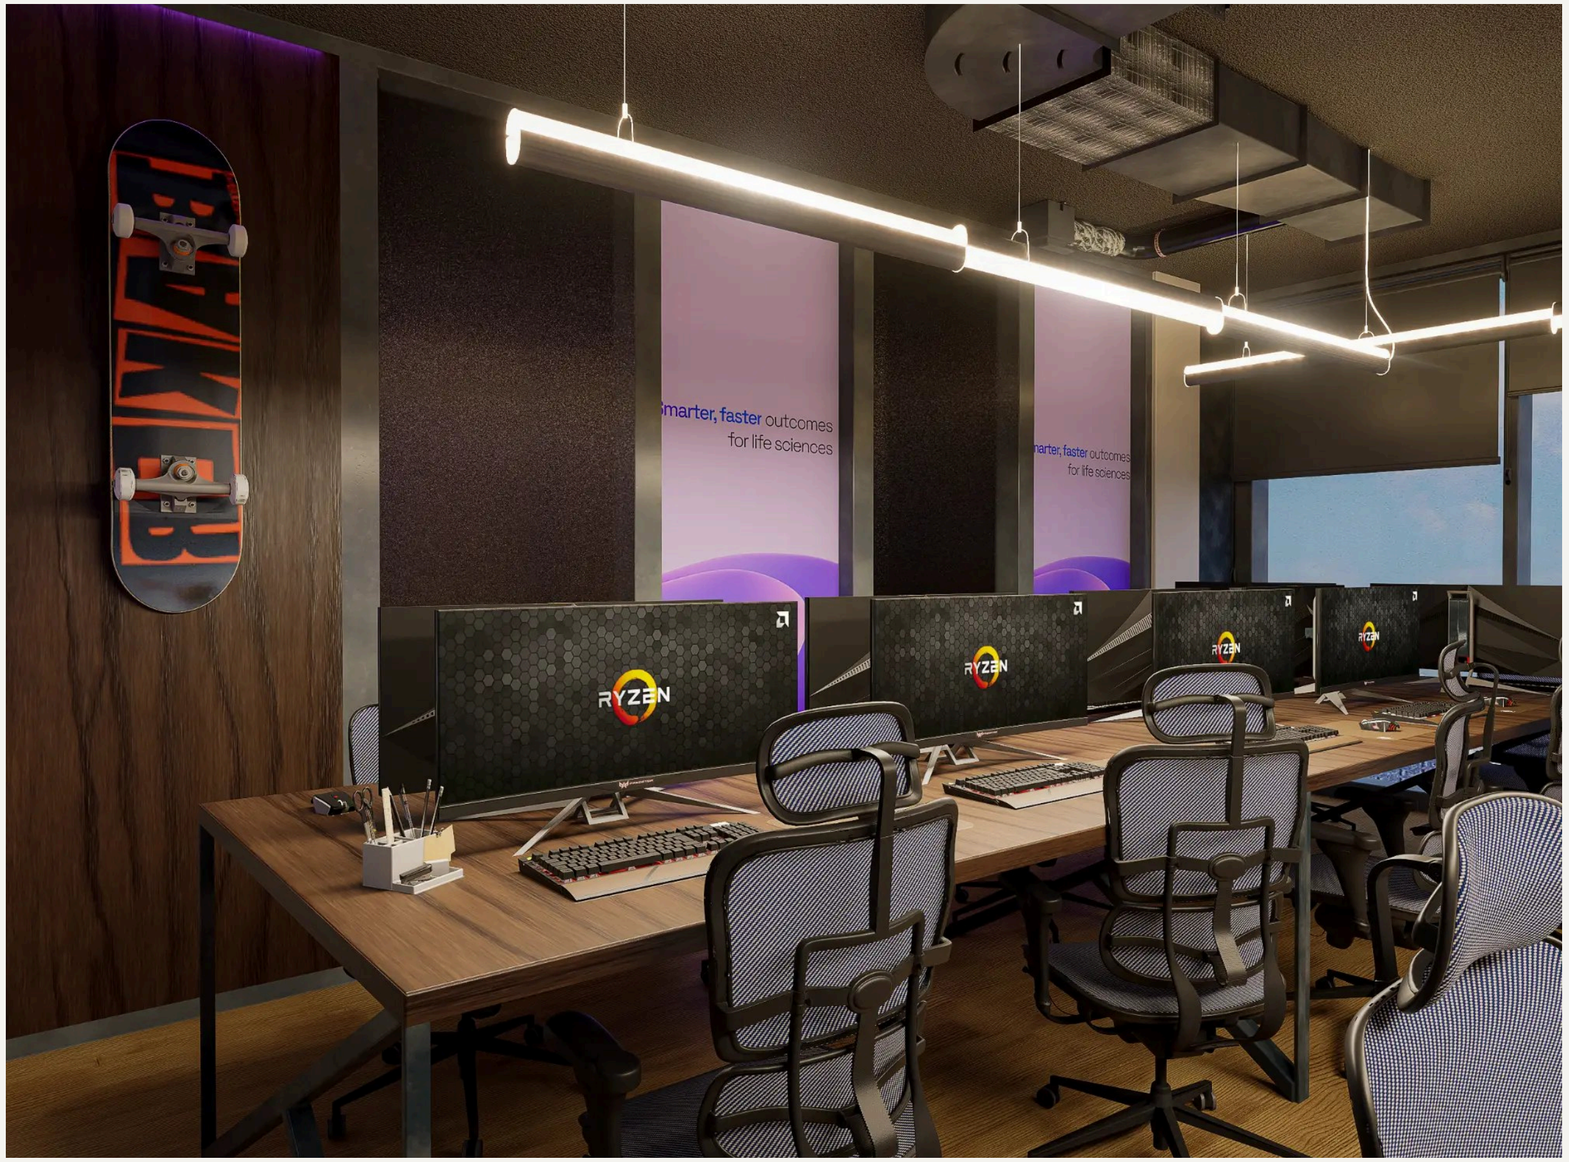

Envision AI Labs

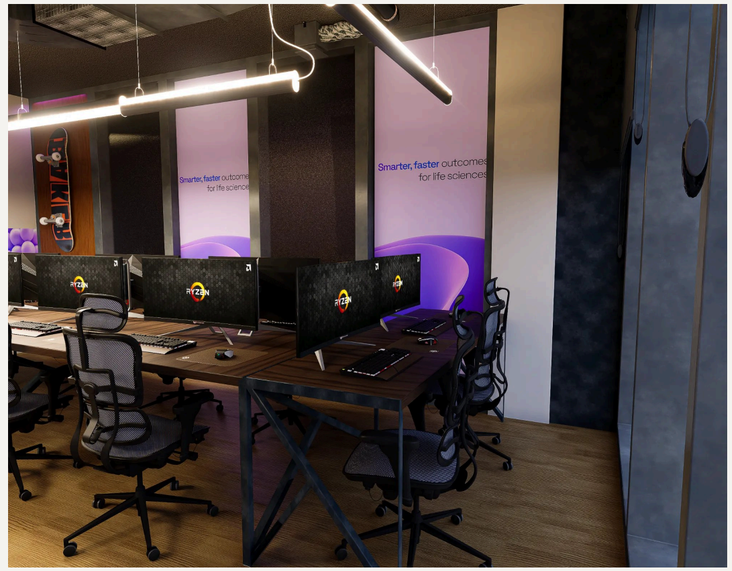

Commercial office · Rajagiriya

An office for the AI team of Envision Pharma Group. We used dark timber and acoustic panels to keep the room quiet for focused work. The company's purple branding comes through in the backlit graphics and linear pendant lights.

Client	Envision AI Labs, part of Envision Pharma Group
Type	Commercial office fit-out
My role	Design, visualization and execution

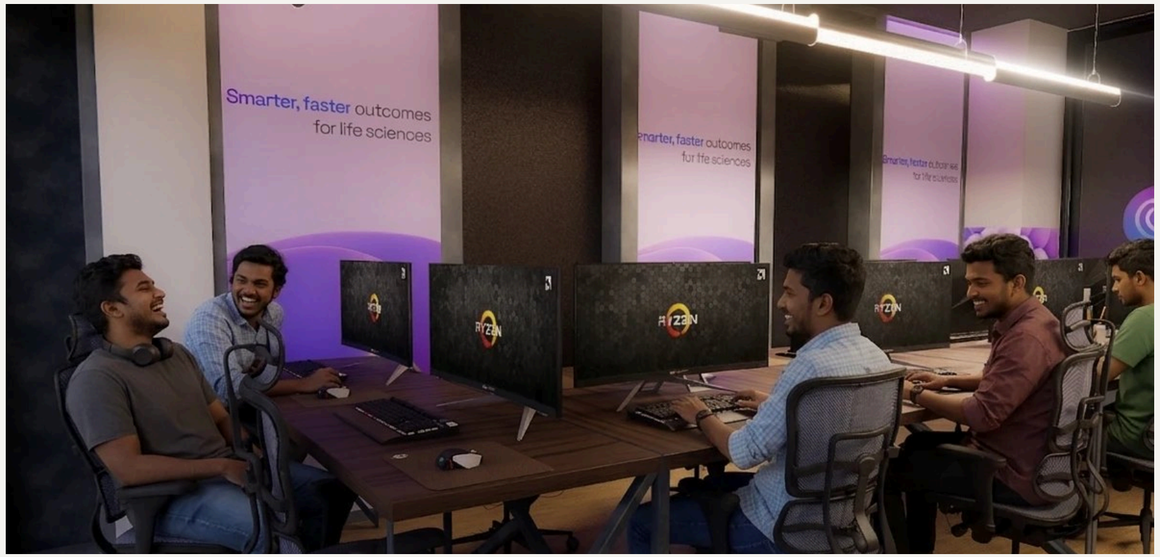

Workspace. Long timber benches and ergonomic chairs under continuous linear lighting. The branding sits on backlit wall panels.

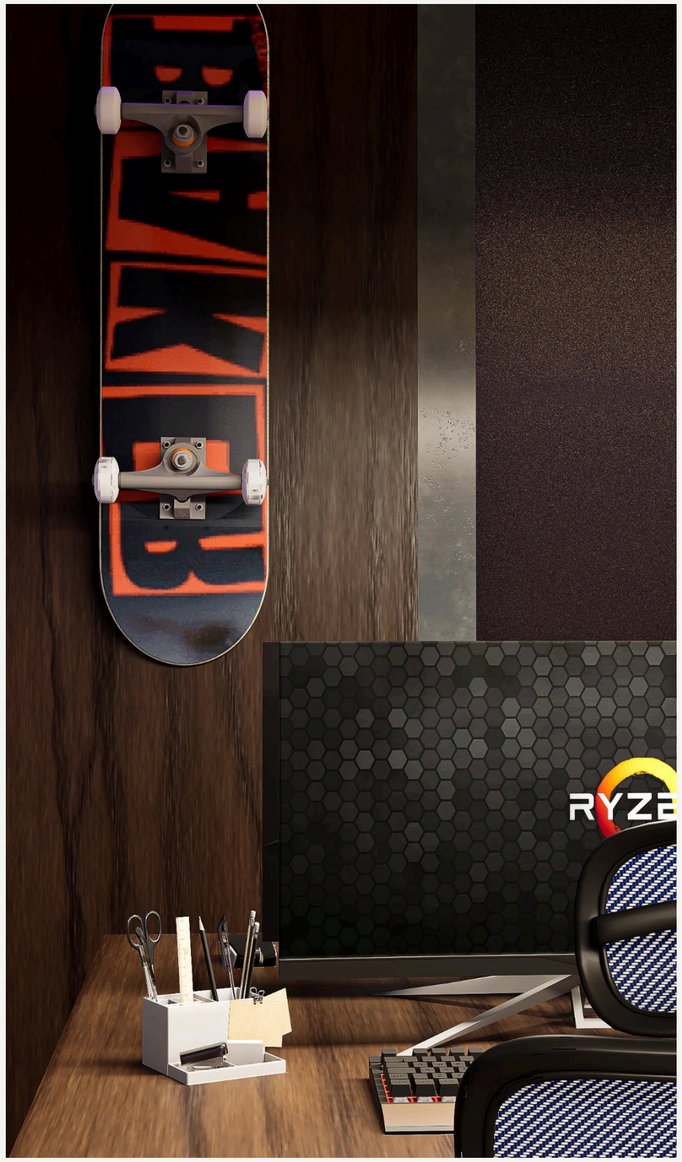

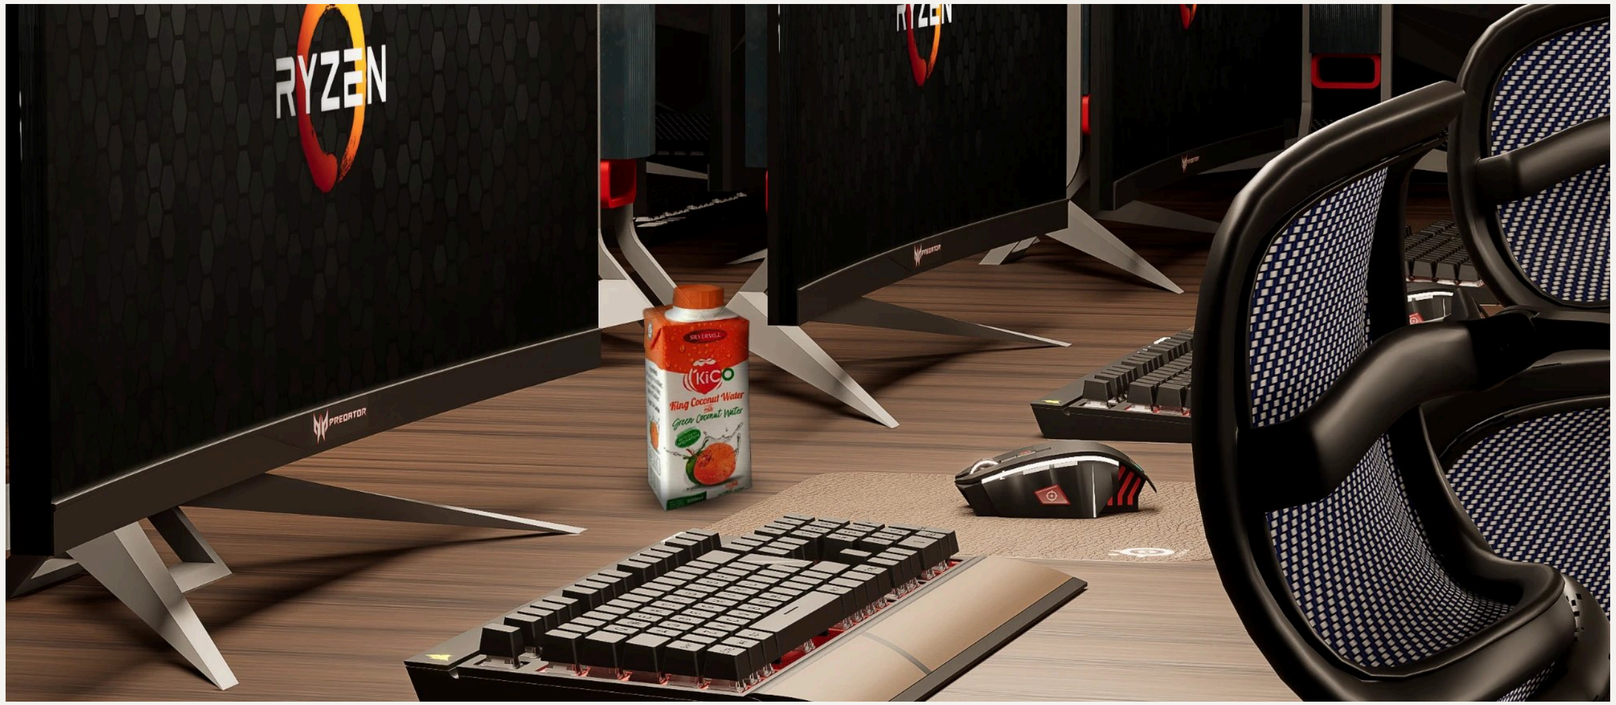

Layout. Two bench rows with a clear central aisle, branded panels on both walls.

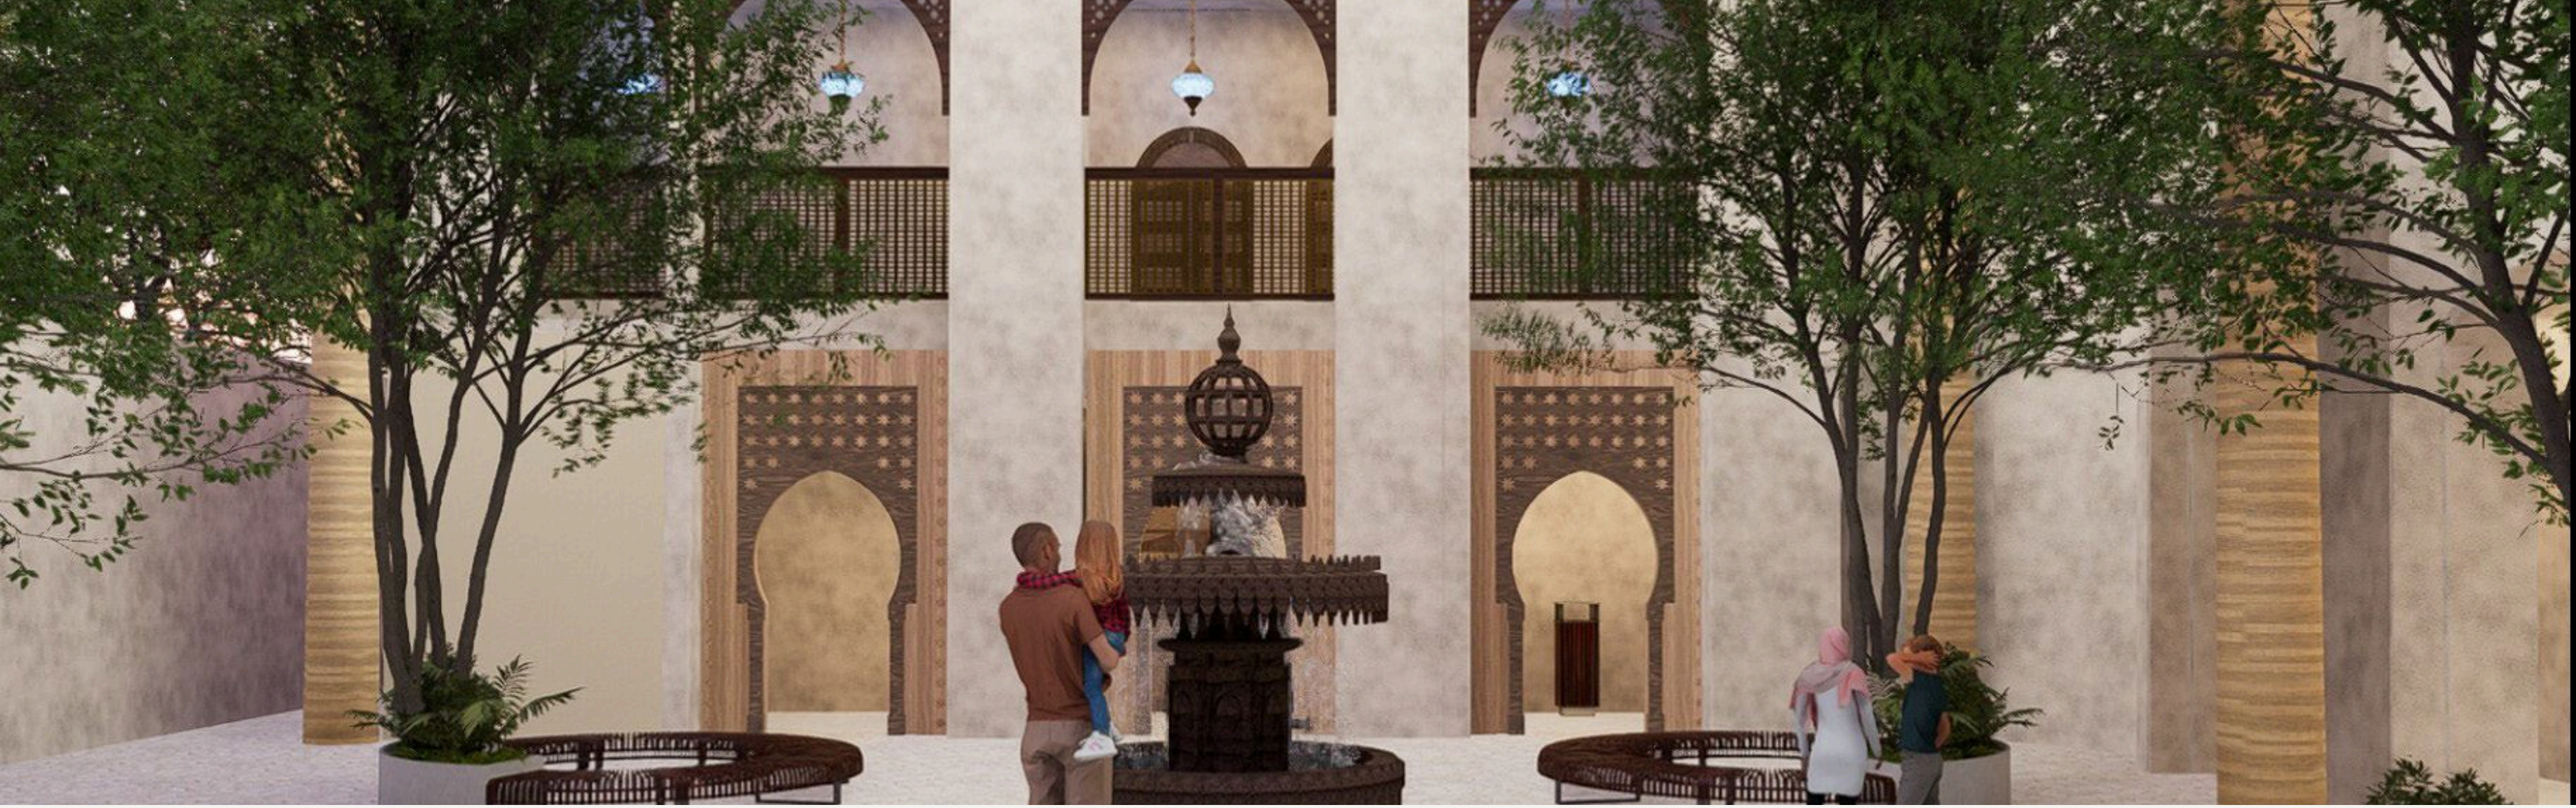

In use. The space shown with people, for the client presentation.

Materials

Dark walnut-tone timber, textured acoustic wall panels, an exposed services ceiling and warm oak flooring. The skateboard on the wall is one of a few personal touches.

02

Ummu Dhardha Ladies' Islamic College

A full interior and exterior proposal for a ladies' college in Akkaraipattu. The client gave me the floor plan, and I designed the spaces and made every model and render.

Status	Client project, 2026
Brief	Floor plan provided by the client
My role	Design, interiors, materials, 3D and visualization
Tools	SketchUp, D5 Render

Auditorium. Terracotta seats under a lattice ceiling based on Islamic geometric patterns. The warm aisle lighting switches to stage washes for events.

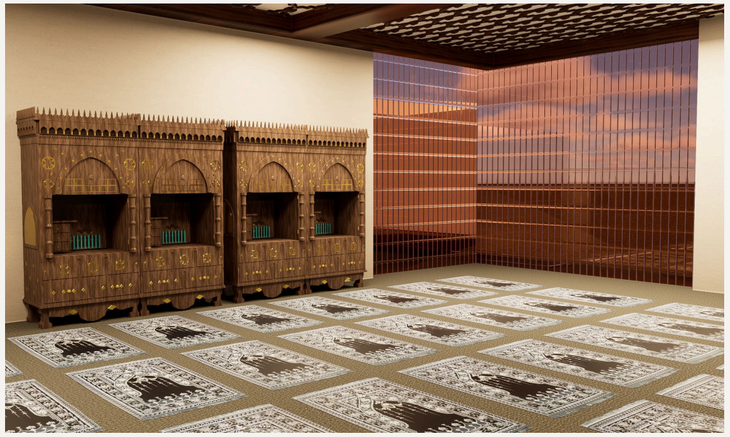

Layout. Furnished top-down view, built from the client's floor plan.

Render. A brass screen on the feature wall and deep-teal joinery, plus a lounge corner for visitors.

Library and prayer room. Carved timber shelves and a geometric ceiling. The prayer room has an L-shaped glass facade that opens to the sky.

Classroom. Patterned timber windows and warm daylight.

Staff room and **computer lab**

03

Ceylon Tower

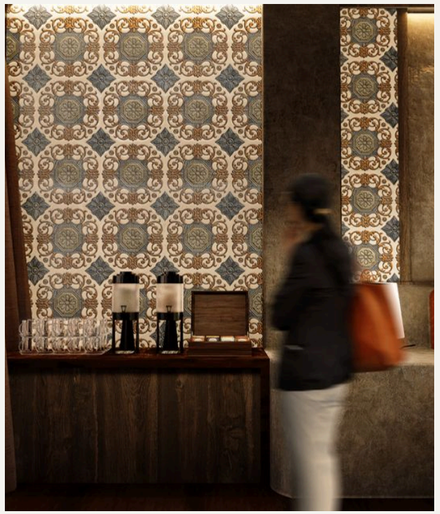

Kalubowila, Colombo

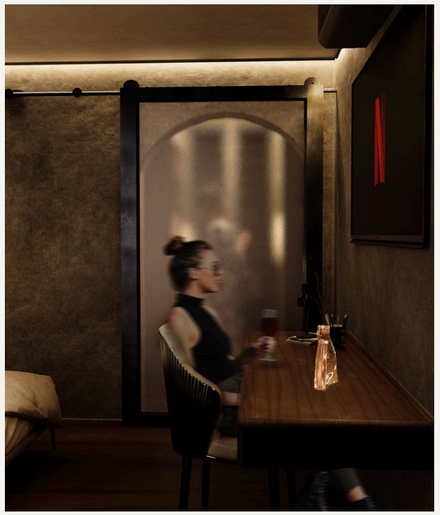

A guestroom for a luxury city hotel. I built the room around a full-height backlit wall of patterned tile, inspired by Sri Lankan decorative crafts.

The rest of the palette is raw concrete, dark timber and cognac leather, with layers of warm lighting.

Status	Client project
My role	Interior design and visualization

04

U.S. Polo Assn. Kandy Flagship

Hillside site, Kandy

A timber-clad store that sits low in the landscape. The back is fully glazed and looks onto a paddock, so shoppers can see horses grazing while they browse.

Status	Academic project, AMDT
Scope	Concept, facade, layout and visualization

Street view at dusk. Wet road, warm light from inside.

Sales floor. Timber ceiling, paddock view.

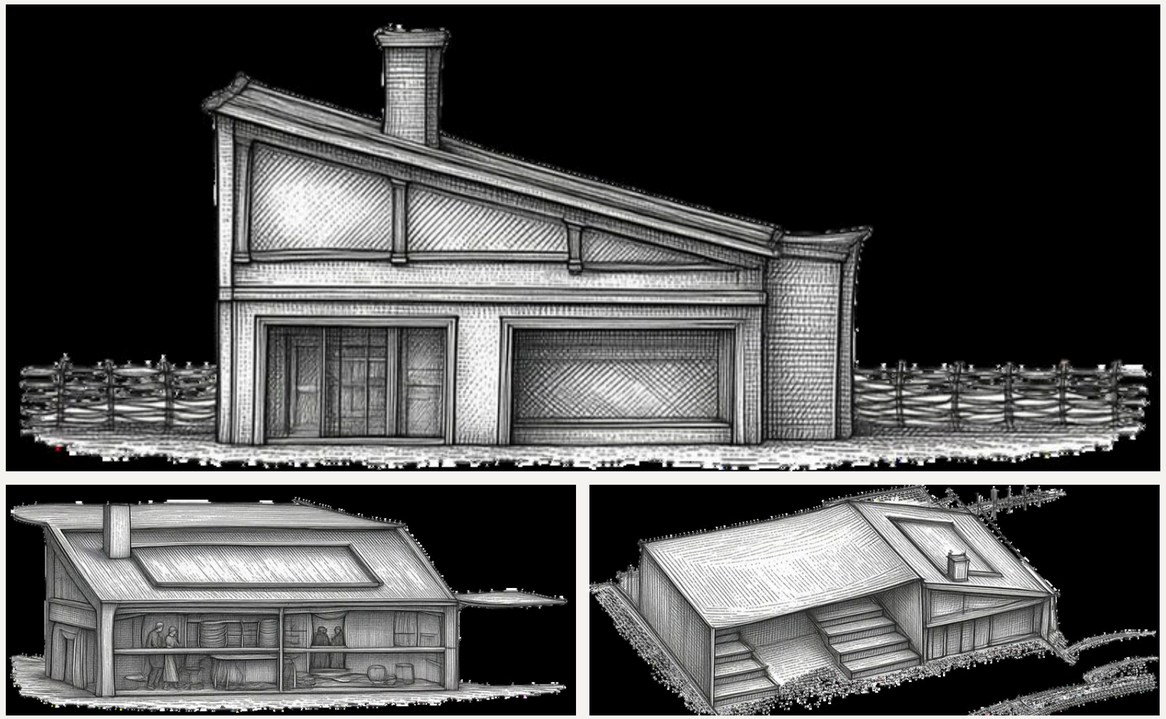

Paddock frontage.

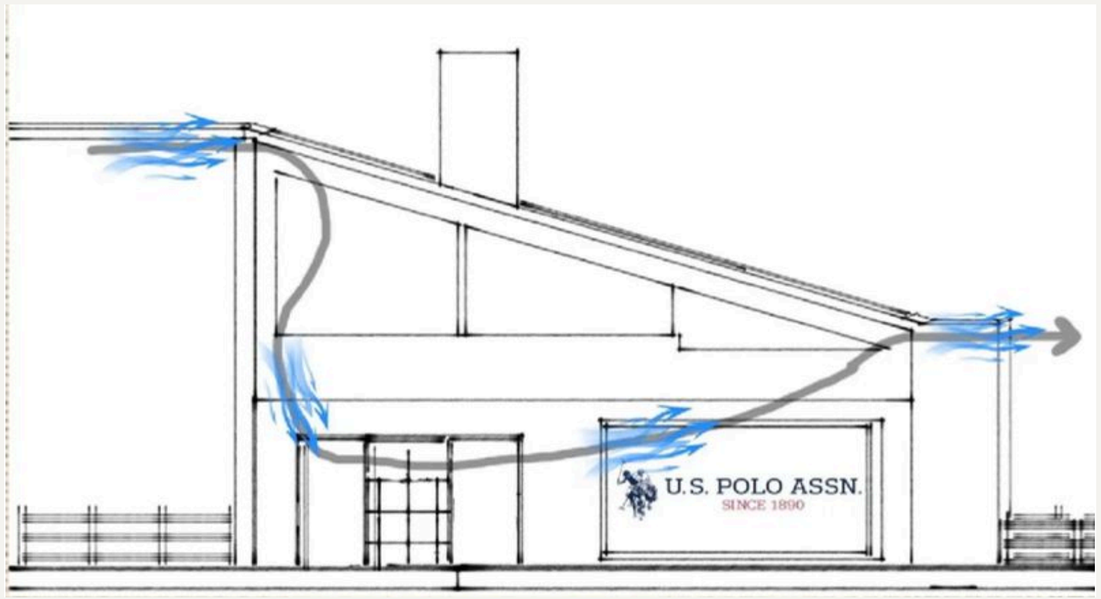

The brick chimney is a reference to old estate buildings. Wisteria and planting stop it looking like a typical retail box. Covered parking is inside the building footprint.

Concept to section

AI-assisted concept exploration. I tried quick massing options before modelling.

Passive ventilation section. Cool air comes in low through the glazed frontage and escapes at the top of the pitched roof. In a tropical climate this cuts the cooling load.

05

Senehasa Sanctuary

Sinharaja rainforest

An animal medical and rehabilitation centre inside a UNESCO rainforest. It's raised on piloti so the forest floor stays untouched. Boardwalks run above the undergrowth, and there's a helicopter platform for rescues.

Status	Concept project
Approach	Steel frame, timber cladding, renewable power

Aerial and entrance views.

Brand and art direction

Leona Properties

My villa management and travel company. I did the identity, vehicle livery, uniforms and listings.

Carriage Clothing

Creative direction on a menswear launch, which reached 27,916 views and 8,947 accounts.

Let's work together.
